Subject: September 2019 Unassigned Bridge Inspections
Attachments: Instructions_Assigning Inspections.pdf

The following list of agencies currently have unassigned NBI inspections in MiBRIDGE that are due during September or earlier. This message is being provided in accordance with Bridge Advisory BA-2014-03. Per the requirements of the Michigan Structure Inspection Manual (MiSIM), Table 3.05.01, bridge owners should assign their inspections to an inspection team leader one month prior than the month they are due. This includes local agencies who perform inspections with internal inspection team leaders or bridge owners that perform the work themselves. **Instructions describing the steps that a bridge owner should take to assign inspections in MiBRIDGE are attached to this email.**

An additional subsequent warning after one month of the inspection being past due will result in a non-compliance determination, immediate withholding of Act 51 monies, and suspension of Federal Aide and Michigan Transportation Fund (MTF) obligation authority until the non-compliance has been sufficiently addressed.

As a result of the PY2017 National Bridge Inspection Program review (NBIP), FHWA has determined that MDOT did not fully meet the requirements of 23 CFR 650.311(a). The NBIP Metric 6 and 7 Improvement Plan has been enhanced to include TSC Managers in this notification. For questions concerning this message please contact MDOT-MiBridge-Admin@michigan.gov.
